# **Societal Aspects of REACH and Alternatives to Animal Experimentation**

**Dr. Kurt Fassbender, Institute for Public Law, University of Bonn**

## **I. Introduction**

## **II. Analysis of the law of the EU Treaties**

- 1. The legal starting-point: the competence of the Union**
- 2. The competence to facilitate the functioning of the internal market**
- 3. The obligation to achieve a high level of protection concerning health, safety, environmental protection and consumer protection**
- 4. The obligation to take into account the societal aspects of the Community policy**
- 5. The obligation to observe the fundamental rights**

- 6. The competence to ensure the welfare of animals**
- 7. The principle of proportionality**
- 8. The discretionary power of Community legislature**
- 9. Consequences for the balancing of the different issues at stake**

### **III. Analysis of the proposed REACH regulation**

- 1. Provisions relevant for the conflict between protection of human health resp. of the environment and protection of animal welfare**
- 2. Provisions that allow to meet other concerns of society**
- 3. Conclusion**
